

Owen Christensen

4727 9th Ave NE - Seattle 98105 - 206-557-0901 - oachristensen3@gmail.com - <https://www.linkedin.com/in/owen-christensen-647299256/>

Detail-oriented Technician with hands-on experience in satellite production and electronics troubleshooting. A fast learner who is proficient in electronics troubleshooting using oscilloscopes and logic analyzers, as well as identifying and solving complex problems.

Experience

February 2024 - September 2024

Starlink, Redmond- Satellite production technician

- Adapted quickly and painlessly through a rapidly changing work environment. Able to easily move around departments and adjust to new systems
- Worked carefully and efficiently in a detail-oriented environment, consistently meeting deadlines with a near-zero defect rate
- Made contributions to improvements in production, such as identifying common errors in tooling and finding common defects and their causes.
- Worked with test technicians when finding and diagnosing issues, learning, identifying, and working to stop the root causes of common defects.

Jan 2023 - Feb 2024

Quick Ship Brands, Redmond- Consumer electronics repair technician

- Taught myself new skills quickly in a self-directed environment, adapting to new devices as they were released
- Handled small and delicate devices, repairing upwards of 20 devices a day

Education

September 2024 - September 2025

North Seattle College

Relevant Coursework: Calculus I-III, Engineering Physics I & II

September 2019 - September 2021

South Seattle College- Associate of Arts

Full two-year prerequisites, including English, math, and science, as well as basic programming.

Projects

Physical hardware physics simulation - GitHub link (<https://github.com/Oachristensen/Gravity-Cube>)

- Programmed, modeled, and assembled myself
- Used testing devices such as logic analyzers and oscilloscopes in debugging
- Used an RTOS and embedded Linux for the timers and simulation
- Worked through hardware and software bugs, leading to a fully functional finished product

Skills

Hardware & Diagnostics: Oscilloscopes, Logic Analyzers, Multimeters, Component-level Troubleshooting, Root Cause Analysis, PCB Schematic Reading, Soldering.

Software & Systems: Embedded Linux, RTOS (Real-Time Operating Systems), C.

Professional: Detail-Oriented, Technical Documentation, Quality Assurance, Teamwork and communication
